

More than just a green hotel...

A way of life for making the world a better place for everyone

At Park Lane, We are committed to reducing our impact on the planet. Here are some simple steps we are taking to share with you:

Solar Power

Your cottage is solar powered and constructed primarily out of reclaimed and repurposed building materials.

Please help us reduce our energy usage by turning the heat down or AC up, turning off the TV, and unplugging personal electronics when you go out for the day. On a cool night you may enjoy opening a window before you sleep to let in the fresh evening air

Recycling

Here in Austin we enjoy curbside single stream recycling.

For your convenience, we have placed a small recycling bin in your room. Please place all glass, plastic and paper in the bin. No need to sort.

Water

Your drinking water is freshly filtered in a Brita filter pitcher.

Feel free to refill your own water bottle before heading out for the day. This saves money and reduces the need for disposable plastic.

Housekeeping

Housekeeping service is included on a daily basis.

Our 100% cotton sheets and towels will be changed on the third day of your stay unless service is requested sooner. If you prefer fresh towels, just place your towels on the bathroom floor or in the tub for housekeeping. Need extra towels or a sheet freshening sooner? Just let us know anytime. Our service is always chemical and fragrance-free and we use all natural products for your comfort and your health.

Breakfast

Our homemade breakfast is local, organic, ova-lacto vegetarian.

It will include eggs, dairy, fresh fruits and vegetables, and never any meat. We grow our own fruits, veggies and herbs, in season, to share with you and strive to provide a delicious, simple organic breakfast for you to enjoy each morning. Please let us know in advance if you have any dietary restrictions
